The official website, www.pavainnov.com

Parameter

Dimensions: 25 * 113.5 * 15MM
Power range: 5-30W
Battery: 1,000 mAh (built-in)
Output voltage: 3.2-4.2V
Charging voltage: 5V / 2A
Resistance range: 0.4-1.2 Ω
capacity: 2mL
Resistivity: 0.4 Ω / 0.7 Ω

UI interface introduction:

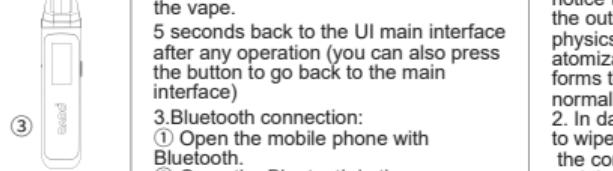

Select the theme in the menu to select the theme style. Long press the button to determine the theme (after selecting the theme, you can exit without waiting for 5 seconds on the interface, or you can choose the return at the bottom and return to the main interface)

Dial interface: select the dial on the menu page, you can select the dial style. Long press the key to determine the dial (after selecting the dial, you can exit for 5 seconds without moving the interface, or you can choose the return at the bottom and return to the main interface)

Product list:

This product includes: one cigarette pole, two smoke bombs, one manual, one USB charging line, a hanging rope. Step First Step. Fill the electronic liquid, open the filler and pour the oil. It is recommended to keep two-thirds full. the second step. Install the atomizer and insert it into the module. the third step. Start using the device, saturate the coil for about five minutes, and you're free to use the device. You can adjust the airflow for the best vaping experience.

Suspiration animation: 4 kinds of suction animations to make you more interactive.

Software operation instructions

1. Switch machine: Short press the button for 5 times.

2. Button function: Short press the button twice to enter the menu, short press the button to select the function, and long press the confirmation function.

Press the button for 3 times in the UI interface to adjust the power size. Short press 4 times to lock or unlock the vape.

5 seconds back to the UI main interface after any operation (you can also press the button to go back to the main interface)

3. Bluetooth connection:

① Open the mobile phone with Bluetooth.

② Open the Bluetooth in the menu inside the cigarette bar and look for Horiz pro on the phone.

③ Click the connection and wait for the connection to complete. Once you connect to Bluetooth, you can answer or reject a call. (Short press the button to answer, long press the button to hang up.)

4. Select universal in the menu page, and you can enter the switch box to restore the factory Settings

5. Select the power in the menu, and choose the intelligent mode (which will intelligently match the corresponding power with the resistance value of the smoke bomb) and the custom mode (which can adjust the power size by itself)

6. Select the custom function in the menu, and you can synchronize the address book according to your own needs, manually calibrate the time (short press + 1, long press to

determine), adjust the RGB light mode, turn on or off the vibration, and choose the language.

7. Click the selection record in the menu to check the number of suction openings in the past 7 days

safe guarding

Timeout protection: 5 seconds, short circuit protection, over charge protection, low power protection, output overcurrent protection

Maintenance and cleaning

1. When using the device, you may notice the occasional condensate on the outside of the cartridge. The law of physics determines that the smoke will atomization, and then condensation forms the condensate, which is a normal phenomenon, inevitable.

2. In daily use, wet paper can be used to wipe the connection between the device and the atomizer to avoid poor connection between the device and the atomizer.

3. When a small amount of condensate is found inside the device during use, we recommend pulling out the atomizer, reversing the device and shaking it for a few seconds.

Notes appended to a book

1. This product is not recommended for minors, non-smokers, pregnant or lactating women, or anyone at risk of heart disease, depression and asthma.

2. Keep the equipment away from heat, fire and water sources. The device shall be stored in a cool environment

3. Do not drop, throw, or immerse the equipment in the water.

Gaya tampilan jam. Tekan dan tahan tombol untuk mengonfirmasi putaran (setelah memilih putaran, tunggu 5 detik untuk keluar tanpa memindahkan antarmuka, atau Anda dapat memilih kembali buku alamat sesuai dengan kebutuhan Anda, Anda dapat mengkalibrasi waktu secara manual (tekan sebentar +1, tekan lama untuk konfirmasi), Anda dapat menyesuaikan mode pencahayaan RGB, Anda bisa menghidupkan atau mematikan getaran, dan Anda dapat memilih bahasa).

Petunjuk pengoperasian perangkat lunak

1. Menghidupkan dan mematikan: tekan sebentar tombol 5 kali.
2. Fungsi tombol: Tekan sebentar tombol dua kali untuk masuk ke menu, tekan sebentar tombol untuk memilih fungsi, dan tekan lama untuk mengonfirmasi fungsi.
3. Klik menu dan pilih fungsi rekam untuk memeriksa jumlah isapan dalam 7 hari terakhir.

Keamanan

Perlindungan batas waktu: 5 detik, perlindungan sirkuit pendek, perlindungan overcharge, perlindungan baterai rendah, perlindungan arus lebih keluar

Pemeliharaan dan pembersihan

1. Saat menggunakan perangkat, Anda mungkin segera melihat pengembunan di bagian luar kartrid. Hukum fisika menentukan bahwa cairan asap akan mengatomisasi dan kemudian mengembun membentuk kondensat. Ini adalah fenomena normal dan tidak dapat dihindari.
2. Dalam penggunaan sehari-hari, Anda sering kali dapat menggunakan kertas basah untuk menyeka sambungan antara perangkat dan alat penyemprot untuk menghindari koneksi yang buruk antara perangkat dan alat penyemprot.
3. Jika ditemukan sedikit air kental di dalam perangkat saat digunakan, kami sarankan untuk mengeluarkan alat penyemprot, membalikkan perangkat, dan mengocoknya selama beberapa detik.
4. Pilih Umum pada halaman menu untuk masuk ke kotak saklar dan mengembalikan pengaturan pabrik.
5. Pilih mode tampilan jam: Pilih tampilan jam pada halaman menu untuk memilih cerdas (yang secara cerdas akan

5. Kami tidak menyediakan layanan purna jual untuk inti atomisasi. Pindai kode QR untuk mendaftar di situs web.

Peringatan

Kebocoran pod

Ada kemungkinan kebocoran e-liquid pada tekanan tinggi saat Anda bepergian melalui udara. Oleh karena itu, harap pisahkan pod Andadari objek penting lainnya. Mengatasi Kondensasi Mungkin ada sedikit kondensasi cairan karena perbedaan antara suhu dalam dan luar ruangan saat Anda menggunakan perangkat. Dianjurkan untuk mengeluarkan pod, dan kocok ke bawah.

6. Reciclaje EEE : Este producto no debe considerarse como un desecho comÃn del hogar, en cambio debe llevarse al punto de recopilaciÃn adecuado para el reciclaje de equipo elÃctrico y elÃctronico.

7. Reciclaje de baterÃa: La baterÃa de este producto no debe considerarse como un desecho comÃn del hogar, en cambio debe llevarse al punto de recopilaciÃn adecuado para el reciclaje de baterÃa.

8. Se recomienda usar el cable USB proporcionado por pava para cargar el dispositivo.

9. Luego de un periodo largo sin usar el dispositivo, para evitar una descarga, se recomienda cargarlo con regularidad.

10. El periodo de almacenamiento del equipo debe ser entre 3 meses: la temperatura ambiente debe ser entre -5°C a 30°C, con una humedad de 25%±75%RH.Temperatura operacional de cigarrillo elÃctronico:0°C a 40C.

11. El desarme estÃ prohibido luego de una falla en el producto.

12. Solo para cargar en interiores, use un cargador USB UL certificado para cargar el dispositivo para evitar un peligro de fuego o explosiÃn.

Professional Edition

Lista de productos:
El producto incluye: un poste de cigarrillos, dos bombas de humo, un manual, un cable de carga USB y una cuerda colgante.

Paso
El primer paso. Rellene el lÃquido elÃctronico, abra el relleno y vierta el aceite. Se recomienda mantener dos tercios llenos.

El segundo paso. Instale el atomizador e inserte en el mÃdulo.

El tercer paso. Comience a usar el dispositivo para saturar la bobina durante unos cinco minutos y pueda usarlo libremente.

Instrucciones de operaciÃn del software

1. mÃquina de cambio:

Presione el botÃn 5 veces mÃs corto.

2. funciÃn del botÃn:

Presione el botÃn dos veces en corto para ingresar al menÃ, Presione el botÃn en corto para seleccionar la funciÃn y presione la funciÃn de confirmaciÃn en largo.

6. reciclaje de equipos elÃctronicos y elÃctricos:

los productos no deben tratarse como residuos domÃsticos y deben enviarse a los puntos de reciclaje de equipos elÃctronicos y elÃctricos.

7. reciclaje de baterÃas:

las baterÃas de este producto no deben tratarse como residuos domÃsticos y deben enviarse a los puntos de reciclaje de baterÃas y cables USB

ProtecciÃn de Seguridad

ProtecciÃn de horas extras:

5 segundos, protecciÃn de cortocircuitos,

protecciÃn de sobrecarga, protecciÃn de baja potencia, protecciÃn de sobrecorriente de salida

Mantenimiento y limpieza

1. al usar el dispositivo, puede notar que ocasionalmente aparece agua condensada fuera del cartucho de tinta.

Las leyes de la fÃsica determinan que el humo se atomizarÃ y luego se condensarÃ para formar condensado, lo cual es un fenÃmeno normal e inevitable.

10. el periodo de almacenamiento del equipo debe ser de 3 meses:

temperatura ambiente de 5 - 30 °C y humedad de 25% - 75% rh. i

temperatura de funcionamiento de los cigarrillos elÃctronicos: 0 C - 40 c!

Recordatorio cÃlido

Pod publica:

Cuando viajas en avÃn, el lÃquido elÃctronico puede filtrarse a alta presiÃn

D. Warranty does not include any nonbrand products.
